## Technologies and Skills

**Proficient in a range of languages, frameworks, and tools here. I've participated in a Hackathon and got 2nd position out of 4700 participants. I've contributed to 5+ open-source projects resolving critical bugs.**

## EXPERIENCE

**Venn Solutions** – *Full Stack Developer*      Sep 2022 – Present
- **Developed** core business products.
- Built an **Advanced Profit and  GST Calculator, and FBR Management system**.
- Enabled **table-to-Excel** exports.
- Reduced website loading time by **2.5s**.

**TheXSolutions**– *Frontend Developer*      May 2022 – Sep 2022
- Redesigned company website, boosting performance by **30%**.
- Developed end-to-end **Burger website**, worked on **Chat App**, **Landing pages**
- Built a **fully responsive**, **smooth experience website** for the users.

**Freelancing** – *Full stack Developer (Frontend Heavy)*
- Built SaaS platforms and MVPs end-to-end and deployed them on servers.
- Built AI Phone Agents that boost conversions and qualifying leads by 10%.
- Worked in teams to build web apps used by thousands of people daily.
- Mentored to help students understand these topics. Learned **leadership, and communication skills**.
- Built a **fully responsive**, **smooth experience website, webapps, landing pages, and Saas** for the users.
- Developed Performance Optimized animated Signup flows and dashboards.

## PROJECTS

**UI Components** [Tech: NextJs, TailwindCSS, Framer motion]      Link
- Learning Design engineering and building interactive components
- Includes showcasing animated components, animation, and motion similar to the iPhone.
- Crafted the front in **Next.js, Tailwind CSS,** and motion backend with **Framer motion**.

**Chat With PDF** [Tech: NextJs, TailwindCSS, LangChain, Pinecone, Firebase, OpenAI]      Link
- Developed this project in a week, Upload a PDF, generates vector embeddings, it enables us to chat with pdf and ask questions regarding the pdf. It also has the context of the previous chat as well.
- Free and Pro plan with a limit per document upload and chat messaging. Stripe for payment integration.
- **Used Next.js 14 App router, Next Server Actions, Clerk for Auth, Firebase.**

**Rocket Dash** [Tech: NextJs, TailwindCSS, Google AI]      Link
- This project contains hand gesture-based rocket movement. Lives system with 5 lives.
- Obstacles in the form of asteroids, Start Menu, Game over Screen, Distance Tracking.
- Web App, Google AI Hand Detection Model. Sound effects, Light/Dark Mode, Micro animations.

**Personal Portfolio** [Tech: NextJs, TailwindCSS, TypeScript, Framer Motion      Link
- This project aims to show my **uniqueness** using my responsive portfolio website.
- Contains Windows Toggle. Showcasing Crafts I've built in 2024.
- I've added my services with animation. Showing last visited user country.
- Projects list view and card view. Added Content Collections for my project detail. ISR, SSR, and SSG implemented.
- SEO Optimized portfolio, OG Images. My experience, projects, and contacts are listed there for folks to know better about me.
- Bottom Navigation Bar with mouse move effect and sound effect.

**Landing Pages from Figma Community** [Tech: Next.js, TailwindCSS, TypeScript, Framer motion]
- Eye for details, practicing some Figma designs with a new approach and mindset. Polished my skills even more.
- Animated website and mobile responsive designs
- Project 1 link  -  Project 2 Link  -  Project 3 Link

## More about the work I do

I mentor students to help them understand the fundamentals of the web. Sharing outcomes, and projects, doing **content creation**, writing **technical blogs**, Learning about design engineering, and participating in Hackathons.
